

HEDRICK ASSOCIATES OF GRAND RAPIDS

NEXT GENERATION PUMPING TECHNOLOGY SEMINAR; SELECTION TOOLS AND MANAGEMENT SOFTWARE.

CEUs
AVAILABLE

HEDRICK ASSOCIATES WELCOMES ARMSTRONG FLUID TECHNOLOGY TO WEST MICHIGAN FOR A SERIES OF TECHNICAL SEMINARS ON NEXT GENERATION PUMPING TECHNOLOGIES, SELECTION TOOLS, AND MANAGEMENT SOFTWARE.

In this seminar, Armstrong will focus on their industry-leading Design Envelope pumping technology and real-world case study conclusions where their systems have yielded significant energy saving and performance benefits in the part-load HVAC industry.

Along with demonstrating how Design Envelope can be used to reduce equipment, installation, and energy costs in HVAC projects, Armstrong will also introduce their pump and accessory on-line selection tool Adept. Adept is a unique selection and design tool available to all engineers on Armstrong's website. This powerful program puts all design options and information in the hands of the user, enabling them to quickly evaluate a variety of design and equipment options.

In addition to Adept, Armstrong will cover their cloud-based, Active Performance Management system. This pump manager service proactively tracks pump performance and provides early diagnostic warnings, web accessible trends and analysis along with producing automated reports.

SEMINAR 1

October 7th, 2019

Latitude 42 Brewing Company. 6101 W Main St, Kalamazoo, MI 49009

SEMINAR 4

October 10th, 2019

Atwater Brewery 201 Michigan St NW, Grand Rapids, MI 49503

SEMINAR 2

October 8th, 2019

Lansing Brewing Company. 518 E Shiawassee St, Lansing, MI 48912

ALL SEMINARS SCHEDULE
